### Part III

The items listed below explain the criteria that must be met in order to be considered:

- a. If your community serves a population of less than 1,000 the following criteria must be met:
  - i. The MS4 system is not contributing substantially to the pollutant loadings of a physically interconnected MS4 that is regulated by the NPDES storm water program.
  - ii. If the MS4 system, requesting a waiver, discharges any pollutant(s) that have been identified as a cause of impairment of any water body to which you discharge and it has been determined that storm water controls are not needed based on waste load allocations that are part of an EPA approved or established "total maximum daily load" (TMDL) that addresses the pollutant(s) of concern.
- b. If your community serves a population greater than 1,000 but less than 10,000 the following criteria must be met:
  - i. The permitting agency has evaluated all waters of the U.S., including small streams, tributaries, lakes, and ponds, that receive a discharge from your MS4.
  - ii. It has been determined that storm water controls are not needed based on waste load allocations that are part of an EPA approved or established TMDL that addresses the pollutant(s) of concern or, if a TMDL has not been developed or approved, an equivalent analysis that determines sources and allocations for the pollutant(s) of concern:
